Fixed evidence
$p = 1/2$
Symmetric user stances
Agreement pressure $a = k/\beta$
pool stance
retain stance
Pooled one-turn audit
$P(Z = z, Q = q) = 1/4$ for all four outcomes
Same pooled law for every a, even after repair
Mean-response feedback (no repair)
$a < 2$: convergence to a common center
$a > 2$: two separated stable equilibria
